June 26, 2003

DATASYST Engineering & Testing Services, Inc., Delafield WI

DATASYST is pleased to announce the acquisition of an additional 10,000 square feet of laboratory space adjacent to the current location at 33511 Highway 18 in Delafield just 25 minutes west of Milwaukee. The additional laboratory space will allow the company to move forward with expansion plans for increased capabilities.

Phase one, is an expansion of environmental testing capabilities which includes the simulation of temperature, humidity and corrosive environments for mechanical and electrical components. Additional chambers are being installed that will accommodate test units up to 80 feet by 17 feet.

DATASYST is a third party testing and design partner to the manufacturing industry. The company has been working with local, regional and national manufacturers for nearly 15 years and is proud to be a family owned business.
